The Blind Foundation is here to help. If you, a family member or friend, is blind or experiencing sight loss, we can provide the support needed to help you face your future with confidence. You can access our services by registering with us. Once you're set up, you'll be able to get a wide range of support. You might wish to access our popular Library Service or learn some tips to help at home. We also encourage independence through showing you how to get around. If you're employed or seeking employment or study options, we can help with that too.
